

Linking Customer Vehicles to Repair Shops in Real Time

- ✓ **Streamline operations with real-time vehicle data**
- ✓ **Increase service visits and customer retention**
- ✓ **Generate recurring revenue by selling subscriptions**

A complete solution for monitoring and managing customer vehicles using advanced diagnostics, repair shop integration, and location tracking (consumers and fleets, Class 1-8).

1

VOYO Bluetooth and LTE telematics devices connect to a vehicle's OBD-II port and transmit live data from onboard systems. **VOYO** devices surpass the capabilities of conventional GPS trackers while delivering the diagnostic power of a professional scan tool.

2

OEM Level Vehicle Data

- ✓ Manufacturer codes from all controllers
- ✓ Symptom byte & freeze frame data
- ✓ Odometer, battery, fuel, oil life & tire pressure
- ✓ Emissions readiness & up to 20 safety alerts
- ✓ GPS tracking & trip history

3

VOYOLink allows owners to connect their vehicles remotely to participating shops with a single click. Diagnostics data is posted directly to popular shop IT systems in **Manager SE**, **Shop-Ware** and **AutoVitals**.

4

VOYOHUB enables shops to resell connected car services and earn recurring revenue. Shops order **VOYO** devices at wholesale pricing, assign them to customers, and create accounts. **Flex Plan** (optional) lets shops lease devices at no upfront cost, making it easy to sign up customers and grow the business.

5

VOYOTRACK is a comprehensive web-based fleet management system included for free with **VOYO** telematics. It provides trip history, safety alerts, vehicle health monitoring, as well as fleet-wide performance metrics. Vehicles can be managed while connected to repair shops through **VOYOLink**.
